

# Ocean Optics and Mavericks Diving

## Present the Great Diving Adventure:

**Free  
admission**

## An Introduction to Digital Photography with Ocean Visions

**Thursday 28th September, 7 for 7.30pm**

*Underwater photography has gone through a revolution in the last five years. Once successful underwater imaging was the preserve of a dedicated few, well schooled in the theory of photography and equipped with cameras costing thousands of pounds. Today, divers are taking great pictures with low cost equipment and little experience. The genesis of this change is simple – digital imaging.*

*But the huge choice of digital underwater cameras has led to an equal measure of confusion. And many divers are spending just as much cash on less thought out camera systems, as they would have done on much better rigs. Many beginners also find that their first underwater pictures aren't what they hoped for and older hands can find it hard to progress. Which is a shame, because inexpensive digital cameras can really punch way above their weight and compete with images taken on much more sophisticated and costly professional level outfits.*

*Maria Munn is the lady who can show you the short cuts to success. Her company, Ocean Visions, specialise in helping underwater digital photographers to hone their craft. Maria is gaining a reputation for hands on coaching that can help you move from taking snapshots to making photographs you can be proud of. Maria offers courses within the UK and workshops aboard Emperor Divers finest Red Sea liveaboards.*

*Maria's presentation will focus on showing you how to get started in underwater digital photography and avoid some of the pitfalls that await the newcomer. She'll also share hard won tips that will help the more experienced photographer improve their own work. It's an invaluable insight into this all - absorbing aspect of The Great Diving Adventure.*

*A special feature of Ocean Visions' event will be an opportunity to have one – to – one coaching with Maria before the main show. Maria will be at Ocean Optics –Mavericks Diving from 5PM and by strict appointment only will go through your own images with you. Bring your laptop with half a dozen shots and take advantage of Maria's expertise.*

*When we started our Great Diving Adventure presentations, we deliberately invited speakers who were great underwater photographers. Join with us and Maria Munn to learn how to join their ranks.*

*We look forward to your company.*

*Tickets are free, but you must pre register as places are limited and pick up your ticket at the showrooms on the night.*

**The presentation will be held at Kings College opposite the shop and will last about two hours or so.**

### **RSVP to:**

Ocean Optics & Mavericks Diving  
7-8 Bush House, Strand, London, WC2B 4PA
